Game Rules

Poles and Ladders is a game for 2-5 players.

The aim is to be the first to reach Safety Team HQ.

1. Choose a counter.
2. Attach hexagon dice to a pencil.
3. One of the other players should ask you a question from the Question Sheet (supplied in the pack).
4. If you answer the question correctly, place the pencil upright and spin it around; moving the number of spaces shown on the dice.
An incorrect answer means that your turn is over and that you may not move the counter. You only get one question per turn.
5. If your counter lands at the foot of a ladder, you can climb the ladder.
6. If your counter lands at the top of a pole, you must slide to the bottom of the pole.
7. The winner is the counter that reaches Safety Team HQ first.

Quick Game [without questions]

Follow the same rules but leave out the questions; simply spin the dice to move. You only get one spin per turn.
